ANDROID · PHONES AND TABLETS

Install Guide

Version 9.0.30 · Standalone edition
jhconsultnow.com/nexus-point

1 Download

After your Stripe payment you are taken to your download page. Open it **on your Android phone or tablet** and tap **Nexus Point Truck © for Android**. The link works for 24 hours, as many times as you like. Downloaded on a computer? Copy the APK file to your phone (USB cable, Google Drive or email to yourself).

2 Allow install from unknown sources

Nexus Point Truck © is installed directly, not from Google Play, so Android asks for permission once.

1. Tap the downloaded file (in Chrome's downloads or the **Files** app).
2. If you see "**For your security, your phone is not allowed to install unknown apps from this source**", tap **Settings**.
3. Turn on **Allow from this source**, then press Back.
4. Tap **Install**.

Path on most phones: Settings → Apps → Special app access → Install unknown apps → Chrome (or Files) → Allow from this source. Samsung: Settings → Apps → ⋮ → Special access → Install unknown apps.

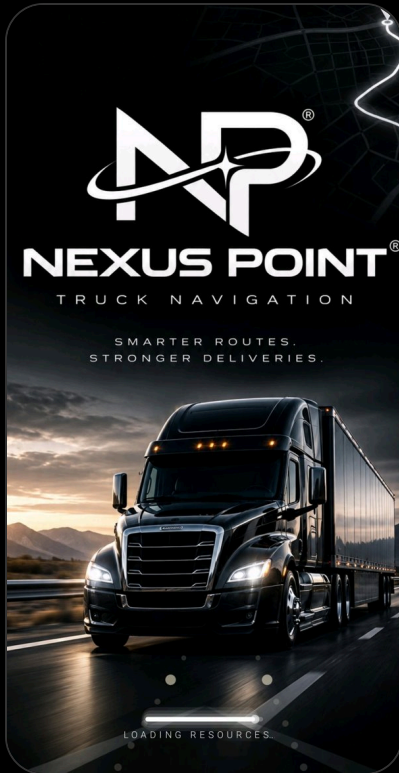

3 Google Play Protect warning

Play Protect may say "**Unsafe app blocked**" or "**App scan recommended**" because the app didn't come from the Play Store. This is expected for direct downloads.

1. Tap **More details**.
2. Tap **Install anyway**.
3. If asked to send the app for scanning, you can choose either option. Installation continues.

Tip: Only install Nexus Point Truck © from your personal download page at jhconsultnow.com.

4 First launch

Open **Nexus Point Truck** © from your home screen. You'll see the loading screen, then the map. There is **no sign-in, no name or phone number and no approval**.

- Allow **Location** (While using the app) so navigation can follow your truck.
- Open **Truck profile** and enter height, weight and length for truck-safe routes.
- Use **Offline maps** to download areas with weak signal.

5 Music player size: Phone or Tablet

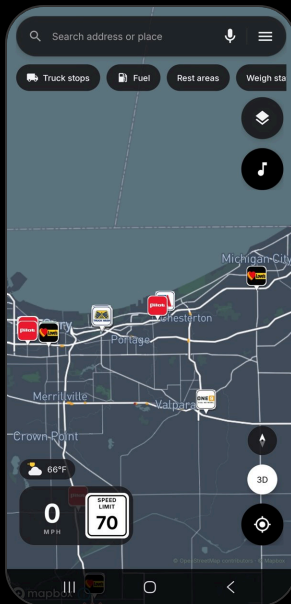

Open **Settings** → **Music player size** and choose **Tablet (bigger)** or **Phone (smaller)**. The floating player can be dragged anywhere on the map; double-tap its top tab to reset its position. To show your music, allow **notification access** when Nexus Point Truck © asks, then pick Spotify or YouTube Music.

6 YouTube Music and background playback

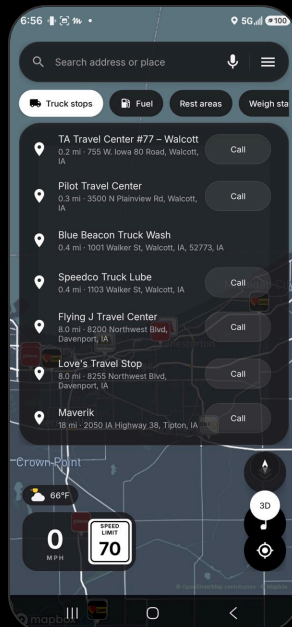

With YouTube Music Premium: music keeps playing in the background while you navigate, and you control it from the Nexus Point Truck © player.

Without Premium: YouTube Music plays only while the YouTube Music app is open in front. Background playback is a YouTube Premium feature; Nexus Point Truck © can't unlock it.
